

What about an intuitive tool to develop behavioral skills?

A tool created by BRIGITTE BOUSSUAT
based on Jung's and Marston's work on human behavior
(4Colors).

Each individual is a unique blend of 4 different behavior styles, represented by 4 colors, for a more intuitive understanding. The 4 colors interact with each other and the blend of the 4 colors will reflect different ways you may approach relationships to others, changes, problems and constraints.

The 4Colors profile will allow you to navigate the world of communication and identify the color of the person you are engaged with.
